

# Arbortext Adapter to Oracle CM/SDK

Leverage the full potential of Oracle Content Management SDK

Arbortext integrates with Oracle CM/SDK to enable automated publishing and improved reuse and collaboration across your organization.

Arbortext Adapter to Oracle CM/SDK improves reuse, collaboration and publishing through its seamless repository integration in Arbortext Editor and the Arbortext Publishing Engine. This adapter is the interface between Arbortext publishing software and Oracle's Content Management SDK. With the adapter, Arbortext users can create, capture and reuse information in XML, manage that information in Oracle CM/SDK, and automatically publish that information to multiple types of media.

The adapter provides the ability to create information at a topic level, store it within the Oracle CM/SDK repository and reuse the topics in a variety of compound documents. By managing content as separate topic components—which can be made up of text, graphics, audio, video or anything you need to manage separately—multiple authors can simultaneously collaborate on different sections, or topics, of the same compound document. In conjunction with the Arbortext Publishing Engine, the adapter also enables automatic publishing to multiple media and audiences from Oracle CM/SDK.

## Key Benefits

### Improves Author Productivity

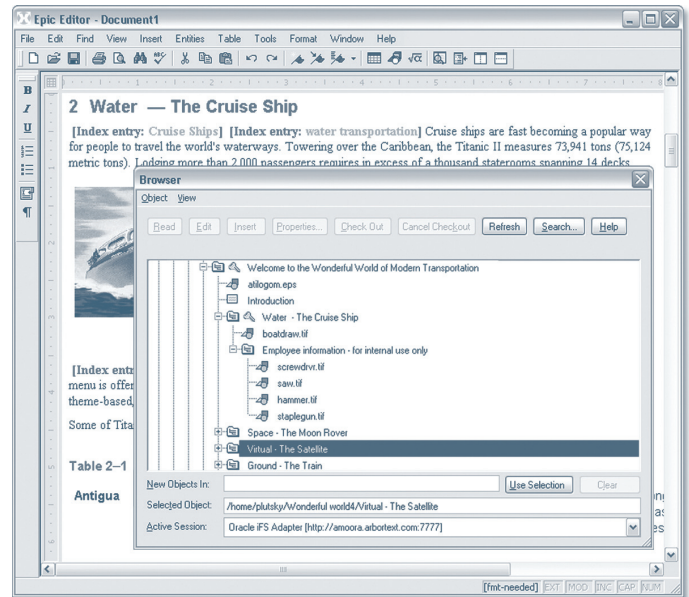

Enables multiple authors to collaborate on the same compound document at the same time and makes information reuse easy.

### Reduces Publishing Costs

Supports information reuse, interchange and automated publishing.

### Increases Information Quality

Provides seamless access to Oracle CM/SDK functions, such as security and versioning functions, through Arbortext Editor.

The Arbortext Adapter for Oracle CM/SDK provides seamless access to repository functions directly from Arbortext Editor.

## Features

### Direct Access from Arbortext to Repository Services

- Check-in/check-out
- Revision control
- Delete
- Rename
- Search
- “Where used” function

### Compound Document Support

- Enables insertion of document components into an open compound document directly or by reference
- Enables document bursting (automatic splitting of documents into multiple components)
- Allows you to configure the rules and element boundaries for bursting documents

### Related Products

The Arbortext Adapter for Oracle CM/SDK is a fully functional, out-of-the-box optional component available separately for Arbortext Editor. The adapter technology is built into Arbortext Publishing Engine allowing Publishing Engine to connect directly to Oracle CM/SDK.

The adapter includes both client-side and server-side modules. The client-side module is an optionally installed module delivered with Arbortext Editor. Licensing is based on the server-side capability which scales depending on the number of servers and the number of CPUs per server.
