

Arbortext Digital Media Publisher

Distribute relevant and timely content on CD-ROM, DVD, other storage media or via web applications

Arbortext Digital Media Publisher enables you to distribute publications on CD-ROM, DVD, or other storage media and provide browser-based access.

Arbortext Digital Media Publisher (DMP) enables you to distribute electronic publications on digital media such as CD-ROM, DVD, flash drives and memory cards, as well as to web applications. Users access the digital media using any common web browser.

With Arbortext Digital Media Publisher, you can easily support complex applications that include multiple languages, volumes and document types. DMP's fully customizable interface also ensures that you deliver your information in an application uniquely suited to your specific requirements.

Key Benefits

Increased Productivity

Enables quick and automatic creation of images for publication on digital media or via web applications.

Reduced Maintenance Costs

Allows you to distribute the same outputs from your XML/SGML source that you may already be publishing to the Web, PDF and other formats, thereby reducing the amount of time spent on creating and maintaining content.

Increased Customer Satisfaction

Enables users to find the right information quickly on digital media with powerful fielded search capabilities.

Optimized Information Delivery

Enables you to distribute stable information on digital media and provide time-sensitive or updated information via the Web.

Use Arbortext Digital Media Publisher to distribute your content on multiple types of digital media.

Features

Arbortext Digital Media Publisher assembles documents and multimedia files for publication. In addition, DMP provides capabilities for distributing updates to your digital media via the web. When your users select "Update Now," the user's system will go out to your website, download all of the updated pages and store them locally on the user's hard drive for later offline viewing.

DMP's advanced search capabilities, including full-text searching, Boolean searches, scoped searches, stemming, and configurable stop words, ensure that your users quickly and easily find the information they need. In addition, search results are returned ranked by relevancy to further aid your users in finding the most useful information.

Digital Media Publisher features include:

- **Document and file support**
Supports all document and file types via standard web MIME types
- **Multiple volumes**
Supports multi-volume images, from 10-40 CDs or DVDs, limited only by the size of your index (which must fit onto a single CD or DVD)
- **Multiple storage media**
Supports CD-ROMs, DVDs, other storage devices such as Flash drives and memory cards, and web applications
- **Full text indexing**
Enables full-text searches by fully indexing XML, HTML, PDF and ASCII files
- **Advanced search capabilities**
Enables Boolean searches (AND, OR, NOT, etc.), configurable stop words and stemming to improve search results
- **Scoped searching**
Limits searches to a subset of the content to refine search results
- **Ranked search results**
Supports relevancy ranking to display most relevant results first
- **Multiple languages**
Supports multi-language content, indexing, searching and user interfaces
- **Encryption/password protection**
Protects your content with 128-bit encryption for product keys and individual user passwords

- **Compression**
Supports file compression to maximize the storage capacity on each volume of information
- **Additional components**
Supports additional components such as browsers and plug-in applications that you can distribute on the storage media along with your content
- **Customizable UI**
Enables you to fully customize the information's look and feel including layout, colors, logos, graphics, search results, tables of contents and language defaults
- **Web updates**
Enables you to provide updated content on the web to avoid obsoleting content distributed on the storage media
- **Automatic change identification**
Automatically identifies and marks for update any files that have been changed, added or deleted after the initial composition

Related Products

Customers who have purchased Arbortext CD-ROM Composer with current maintenance will automatically receive Digital Media Publisher as part of their maintenance program.
